## ROAD 2.0

**Road 2.0** was born as a natural progression of the first work by **Michele Fondacci**, namely «**Road**» precisely, but with an even more introspective dress...

In this evolution the inspiration is not taken from the physical place, but from an inner journey that reveals what you feel when you meet an «unexpected person»: without realizing it a strong bond and new emotions are created, making a relationship so unique that becomes itself source of inspiration.

Nine tracks, nine different sensations, nine episodes that tell a different moment along this road, each one with a specific duration.

The tracks were composed in two days using a new complex method, conceived and developed by the composer himself, through a cataloging of rhythmic and sound parameters, later sapient combined.

A mixture of **Minimalist Music**, **Electronics**,

**Electroacoustics**, **Idm** and **Funk** with a «set-up» made up of percussion instruments (vibraphone, kalimba, bass drum, etc.), electronic instruments (samplers, synthesizers) and unconventional instruments (drill, portable oven), computer keyboard, car parts, metal objects, etc.).

The show will be performed entirely in real time, all without loop stations or pre-recorded sequences; all to give strength and space to the tonal potential of the instruments themselves, and also to leave the performer the chance to merge with them, giving them a soul.

A welcomed return to the concept of «analog», while taking full advantage of modern technologies to their full potential.

For fashion events, biennials of art, in a modern conception room, at an industry festival, Jazz and/or experimental, in a theater, hotel, cinema and anywhere the «sound design» concept combined with the instrumental technical value of the execution is sought.

Possibility to associate Masterclasses, Speech and Educational concerts.

Michele Fondacci is a percussionist, composer, modern electronic musician and in some way a visionary.

This show is in solitude, only surrounded by his «machines» by his «toys», by his drums and by everything that, artfully manipulated, can be converted into music.

The analogic sounds of vibraphone and percussion will be combined with the electronic «grip» of synthesizers in a show made of suggestion, minimalism and emotional introspection.
